Stuart Trahan,
Founder and CTO Compliance,
Software Technology, Inc.

With 20+ years of experience Mr. Trahan is considered a leading subject matter expert in Project Planning, Scheduling, Project Management System Design and Implementation, Training and Execution specializing in the area of Earned Value Management Systems for government contracts where ANSI / EIA-748 compliance is a requirement.

Throughout his career Mr. Trahan has worked on many notable engagements with government contractors including United Defense, Teledyne Ryan, Northrop Grumman, Boeing, Honeywell, ITT Industries, Computer Sciences Corporation, and Lockheed Martin which placed him on programs like the Crusader, Global Hawk, Joint Stars, International Space Station, IRS Business Systems Modernization, National Missile Defense, GPS Block IIR, Chemical Demilitarization Program, and more…
Mr. Trahan is the Founder and CTO of Compliance Software Technology, Inc. His specialized experience provided him with the insight to lead the development of Compliance Software Technology's *forProject™ Controls Automation Suite* commercial software which is receiving a tremendous response in the Earned Value marketplace. Combining Microsoft Project with the *forProject™ Controls Automation Suite*, CSTI's EVMS solutions focus on automating the data management tasks associated with producing accurate reporting data in Microsoft Project and provides seamless integration to an Earned Value Management System or optionally a full Earned Value solution within Microsoft Project with a direct XML interface to CS Solution's wInsight.
